

ELECTRONIC MODULES FOR BRAKES

Bridge Rectifier - Universal Collection

32 07333B40

These half-wave and bridge rectifiers are ideal for installation in the connection boxes of medium power brake motors, brakes and solenoids. Accessories include flying leads and a variety of mounting hardware so that installation on DIN rails is also possible. Encapsulated versions offer an extended operating temperature range. In case of additional DC side fast disconnection, the induction voltage induced by inductive loads is internally limited.

DESCRIPTION	VALUE
Rectifier type	Bridge Rectifier
Input voltage range	0 bis 500 V
Max. current	2 A
Quick shut down	yes over external contact
Overexcitation time	- s
Temperature range	-40...100°C
Connector type	Screw Terminal
Certification	-
Output voltage	$U_{in} \times 0,89 V$
