

ELECTRONIC MODULES FOR BRAKES

PWM-Module - Slim Collection

34 10125C01

Thanks to its extremely compact design, the overexcitation rectifier can be installed in very restricted space. The module features a central bore for screw fixing inside the terminal box. The Slim Collection DC operates as a time-controlled PWM amplifier (pulse width modulation).

Features

- Very small design
- Cost-effective
- Versatile options for assembly and connection through central hole
- Overexcitation function
- Integrated fast shutdown
- Energy savings up to 75%
- Customised holding voltage possible
- Dimensions (LxWxH): 60x24x19 mm

DESCRIPTION	VALUE
Rectifier type	PWM Module
Input voltage range	24 bis 48 V
Max. current	4,0/2,0 A
Quick shut down	no
Overexcitation time	0,2 s
Temperature range	-20...80°C
Connector type	Spring Clamp
Certification	UL (ab Q2/2022)
Output voltage	16,8 VDC V
