OPC UA Platform-independent standard access

612 003 10

OPC UA (**U**nified **A**rchitecture) is a new development of OPC specifications which allows not only for transportation of machine and plant data but also for a semantic description of these data in a machine-readable way. OPC UA is a platform independent standard based on TCP. Information on the integration and use of the OPC servers can be found in the Application Note in the download.

CODESYS OPC UA Server

- Implementation of the communication according to the OPC UA specification using the profile "Micro Embedded Device Server"
- Provision of data about the symbol configuration in the CODESYS Development System
- Communication with any OPC UA client

DESCRIPTION	VALUE
Integrated function	Data exchange with the platform-independent standard OPC UA
Product status	Technology
Application	Platform-independent vertical and horizontal communication
Provision	Firmware
Requirements	Kuhnke control platform, Edge Computer
