HMI PANEL

Vico MT 727 WEB

67781001

The Vico MT web panel combines industrial design with state-of-the-art multi-touch technology.

The brilliant IPS display with robust glass touchscreen and high-quality aluminium frame enables intuitive operation and impresses with its razor-sharp display. The integrated web browser visualises content from various sources and turns the panel into a versatile display and operating unit. Simple switch cabinet installation and the use of industrial components with long-term availability guarantee reliable and low-maintenance operation.

- Integrated web browser for flexible visualisation of various sources
- Brilliant IPS display with multi-touch technology and robust glass touchscreen
- Industrial-grade design with high-quality aluminium frame
- Simple switch cabinet installation and low-maintenance operation thanks to components with long-term availability
