

LINEAR SOLENOIDS

Reversible Linear Solenoid LHR050

1192541

Reversible Linear Solenoids of the LHR series are characterized by high performance. They are delivered with a horizontal characteristic curve. The armature is led on both sides with maintenance-free precision bearings coated with Teflon. This results in a very high resistance to wear, granting consistent solenoid performance throughout a long service life. The reversing solenoids are available in different versions.
