REACH Regulation

Dear,

Thank you very much for your request regarding the EU Chemical Regulation 1907/2006 (REACH).

INTORQ company is a producer of components for the drive technology and a so-called "post-user" under REACH regulations. We are no producer of chemical substances and only already existing substances are used in our products. Under regular operating conditions, the substances contained in our products are not being released. Consequently, the INTORQ products do not underlie any registration obligation.

Independent from this, in our own interest as well as in order to ensure high product safety towards our customers we pursue to implement the REACH directive at our suppliers'. We have communicated to our suppliers of chemical substances and preparations our request for compliance with the REACH regulations.

Commercial Register
AG Hanover, HRB 220878
VAT No. DE 814 222 523

INTORQ solely purchase:

- registered products, preparations and substances.
- materials and articles which do not contain particularly problematic substances according to REACH art. 33, respectively addendum XIV (Substances of Very High Concern / SVHC), as of 25 June 2020, in concentrations higher than 0.1 percent by mass (w/w).

Regarding the materials purchased by INTORQ, we have no information received from our suppliers concerning substances indicated in the SVHC candidate list according article 33 of the REACH Regulation.

With kind regards,

INTORQ GmbH & Co. KG
